

# EzRollback Pro 2.0

for Windows 2008/2003/XP/Vista/2000

## Prevent Data Loss & Ensure Fast Restoration with Combination of CDP & Offsite Backup

EzRollback Pro 2.0 is a true **Continuous Data Protection (CDP) and Restore solution for home users and IT professionals.**

**It combines the advantages of real-time backup and offsite backup for fast and complete file go-back and data recovery.**

**The innovative creation of Restore Points keeps all changed files based on your pre-defined protection plan so that frequently modified files or accidentally deleted files can be recovered by a prior version.**

**This go-back feature proves to be especially useful to programmers of Visual Studio and MS Office users.**

### Continuous Data Protection

The innovative creation of **Restore Points** saves working files into versions of modification for constant retrieving. The point-in-time snapshots taken on modified data are saved in real time so that no data should be lost between the scheduled backups. With the built-in functions to handle open and locked files backup, the MS SQL and MS outlook mail files can also be backed up in real time.

### Local and Remote Backup Destinations

EzRollback Pro offers a unique automatic, real-time, continuous data protection solution besides the traditional scheduled backup. With ways of filtering backup source file by file type and application association, EzRollback Pro brings to users not only convenience, but also high accuracy and efficiency.

### System Requirements

- Microsoft Windows system of 2008/2003/XP/Vista/2000
- Minimum 128 MB of RAM
- Minimum 8GB of hard disk

### Simple, Fast Data Restore

Restoration is alike a breeze, you can either use Windows explorer or EzRollback restore point user interface to go back to a previous version of a file created at certain point-of-time. Any single incremental backup allows you to restore files as the full backup does.

### Self-Service End-User Data Recovery

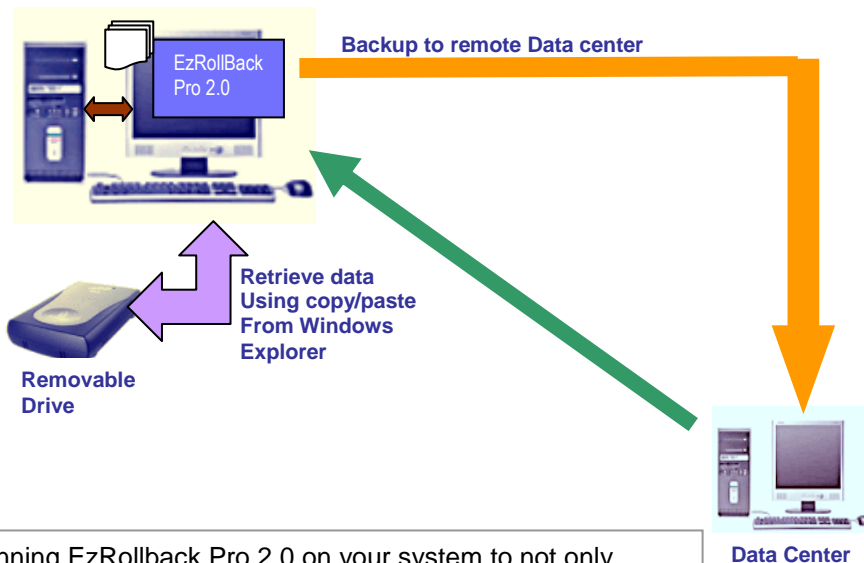

Being able to find needed files and restore them without help of administrative staff or IT professional give the users the sense of control to their files. The effect is beyond convenience, it could seriously help increase productivity and lower administrator costs.

### Reliable and Cost-Effective

Without spending too much money on initial purchase and without spending any money on IT specialist, individuals and small businesses can enjoy the data protection solutions provided by EzRollback Pro to empower their customer relations. This solution will be proven to be most reliable.
